

Architecture, engineering and construction project leaders are tasked with balancing razor-thin margins, complex requirements and increased labor shortages -- making focused workforce planning solutions more necessary every day.

Allitix's AE&C Workforce Planning app reduces the jumbled mess of spreadsheets, emails and whiteboards traditionally used in construction workforce planning efforts -- so management can collaborate more efficiently to reduce downtime and maximize profitability.

Our Experience

Allitix resources can help your company realize the benefits of a platform connecting these various models and groups across your organization to increase projects' staffing readiness so that resources can be quickly allocated to win more business.

We also help enable project managers with resource leveling and PTO planning to avoid burnout so project handovers can occur closer to budget timelines.

We are Allitix

Quite simply, we are "all in" on client success. Our focus is delivering high-value industry solutions through connected planning & analytics. We bring data, people and plans together.

Architecture, Engineering & Construction Workforce Planning

- ✓ Review all ongoing and upcoming projects
- ✓ Track resource readiness
- ✓ Plan your high-level phases
- ✓ Add deliverables as the needs arise
- ✓ Search and request resources based on skills and availability matches
- ✓ Schedule downtime and manage burnout before project impacts occur
